Smith begins by examining the public shaming of men. He argues that men are increasingly being held up to ridicule and contempt in the media and popular culture. This public shaming, he says, is having a devastating impact on men's mental health and self-esteem.

Smith then turns his attention to the workplace, where he argues that men face systemic discrimination in hiring, promotion, and pay. He cites statistics showing that men are less likely to be hired for high-paying jobs

and are more likely to be passed over for promotions. He also shows that men are paid less than women for the same work.

Smith concludes by arguing that the systemic discrimination against men is a serious problem that needs to be addressed. He calls for a change in attitudes and behaviors towards men, and he urges policymakers to enact laws that protect men from discrimination.

From Public Shame to Systemic Discrimination Against Men is a must-read for anyone who is concerned about the future of men in America. Smith's groundbreaking research and insights provide a much-needed wake-up call about the challenges men face today.
