Written by renowned Marxist scholar Suzanne Kelman, the book provides a clear and concise explanation of the basic concepts of historical materialism, and it shows how these concepts can be used to understand the development of human societies.

Historical Materialism is divided into three parts. The first part introduces the basic concepts of historical materialism, including the materialist conception of history, the role of class struggle in history, and the relationship between the economic base and the political and ideological superstructure.

The second part of the book examines the development of human societies from the earliest forms of social organization to the present day. Kelman shows how the different modes of production that have characterized human history have given rise to different forms of social, political, and ideological organization.

The third part of the book looks at the future of human society. Kelman argues that capitalism is a crisis-ridden system that is incapable of meeting the needs of the majority of the world's population. She calls for a new socialist society based on the principles of democracy, equality, and solidarity.

Historical Materialism is an essential read for anyone who wants to understand the world we live in. Kelman's clear and concise writing style makes the book accessible to readers of all levels, and her deep knowledge of the subject matter makes the book a valuable resource for scholars and activists alike.
