

Weimar Germany: Race and Occupation After World War I

The Weimar Republic was a period of great upheaval and change in Germany. The country had been defeated in World War I and was struggling to come to terms with its new status as a republic. The Weimar Republic was also a time of great social and economic unrest. The country was plagued by inflation, unemployment, and political violence. In addition, the Weimar Republic was a time of great racial tension. The presence of foreign troops in Germany and the challenges of racial integration created a climate of fear and suspicion.

The German government and society grappled with the challenges of racial integration in a number of ways. The government passed a series of laws that restricted the rights of foreign nationals and non-white Germans. The government also implemented a policy of segregation that separated foreign nationals and non-white Germans from the rest of society. These policies created a climate of fear and suspicion that made it difficult for foreign nationals and non-white Germans to live in Germany.
